

Lab 9: HTML Forms

Following is a medical form. Please create a html form. Basically, your results should look like the following picture:

Personal Information			
First Name	<input type="text"/>	Gender	<input type="radio"/> Female <input type="radio"/> Male
Last Name	<input type="text"/>	Nationality	Canadian <input type="button" value="v"/>
Address	<input type="text"/>		

Medical History	
<input type="checkbox"/> Smallpox	<input type="checkbox"/> Mumps <input type="checkbox"/> Dizziness <input type="checkbox"/> Sneezing

Current Medication	
Are you currently taking any medication? <input type="radio"/> Yes <input type="radio"/> No	
If you are currently taking medication, please indicate it in the space below:	
<input type="text"/>	

<input type="button" value="Submit"/>	<input type="button" value="Reset"/>
---------------------------------------	--------------------------------------

Instructions

1. Please enter the title as **Medical Form**. Please use tags: `<h1>` , bold, center-align text, font family `verdana` and font color `blue`.
2. Your HTML code should pass the validation.
3. The "Reset" button should work. When you click this reset button, it removes all the contents in your HTML form.
4. For the 3X4 table (three row, four cells), the third row only have two cells. Let the second cell of the third row cross three cells. (use `colspan` attribute)
5. Set the action attribute, for example, `action="process.php"`. We will learn PHP in later classes. The submit button is not supposed to work in this exercise. That is, you will not lose any marks if the submit button does not work.
